Passionate and results-driven Full-Stack Developer with hands-on experience building dynamic, scalable web applications using React.js, Next.js, Node.js, and TypeScript. I thrive on solving real-world problems through clean, efficient code and thoughtful system design. With a strong grasp of modern JavaScript ecosystems and an eye for detail, I focus on creating seamless user experiences and robust backend architectures that bring ideas to life.

---

## Skills:

- **Languages & Tools:** TypeScript, JavaScript
- **Frontend:** React.js, Redux, Next.js, Tailwind CSS,
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB (Mongoose), PostgreSQL, Prisma, Drizzle ORM

---

## Projects:

### Arafat Foundation – [Live](#)

Developed a **real-time loan management dashboard** for tracking borrowers, payments, and financial transactions. **Optimized performance** by implementing API caching and batching to reduce latency and data redundancy. Demonstrated **full-stack development expertise** in handling complex business logic, multi-role access control, and secure file management with production-grade code practices.

### AI MCQ Generator & Test Platform – [Live](#)

An AI-powered multiple-choice question platform designed for Bangladesh job preparation exams. Generates high-quality, contextually accurate MCQs with well-reasoned explanations and balanced answer options. Provides in-depth performance analytics and per-question insights, supported by API rate limiting for reliable and secure operation.

### Atelier Store – [Live](#)

Developed a sleek, high-quality e-commerce platform delivering a smooth shopping experience with elegant design, fast performance, and seamless navigation. Focused on creating intuitive interfaces and robust functionality to enhance user engagement and satisfaction.

---

## Education:

### B.Sc. (Hons) in Botany

Kurigram Government College, National University

---

## Languages:

Bangla (Native), English (Professional)
